The main map interface shows the Johns Hopkins Campus Map. A search bar at the top left contains the text 'Search for Locations'. A red circle highlights the 'Remsen Hall' building on the map. A red arrow points from this circle to a detailed information panel for 'Remsen Hall'. This panel includes 'General Building Information' such as 'Campus: JHU Homewood', 'Ownership: JH Owned', and 'Archibus ID: 0017'. It also provides links for 'Floorplans', 'Utility Shutoffs', 'AEDs', and 'OnBase Documents'. Below the text is a photo of the building and a 'Zoom to' button. To the right of the map is a 'Layers' panel titled 'Layers (Updated: July 2021)'. It lists various map layers with checkboxes, including 'Building Ramps', 'Health & Safety', 'Building Labels' (checked), 'Archibus Interior Space', 'JHU Parking', 'Utilities', 'Security', 'Projects and Construction Areas' (expanded to show 'Projects' and 'Construction Areas' checked), 'Properties & Parcels', and 'All Campuses Aerial Imagery'. A red arrow points to the 'Layers' panel with the text 'Toggle Layers On & Off'. At the bottom center, there is a red arrow pointing to a 'Got Feedback?' link with the text 'We'd love to hear from you! Click on the "Got Feedback?" link to share your comments, suggestions, or questions. Thanks!'. At the bottom right, a red arrow points to the 'OnBase Documents' link in the Remsen Hall panel with the text 'Quick access to documents stored in OnBase'. A red arrow points to the 'Related data is available using these links' text at the bottom center.
